UNION SWITCH & SIGNAL CO.

MODEL 14 POWER INTERLOCKING MACHINE
DETAIL PARTS

CONTACT SPRINGS AND BANDS

Ordering Instructions

When ordering Contact Springs or Bands for the Model 14 Power Interlocking Machine, determine piece number of the part or parts as follows: Find the type of Lever for which part is wanted, in upper left hand corner of tabulation. Assume it to be a Signal Lever (Lever normal center), then the third diagram should be the basis for determination and should the Contact be closed only at the extreme left hand position of the Lever (L in accordance with R. S. A. nomenclature), follow the arrow from the Bracket at the right down to the vertical column, finding L in this case to be the first item in the tabulation.

Now follow the tabulation to the right of L and word your order, "one Contact Spring Plate A-2017, piece number 32177, one Contact Spring Plate A-2017, piece number 32178 and one Contact Band Plate A-2017, piece number 37096, for Signal Lever.

Contact Springs and Bands bear an imprinted number which, for the convenience of those ordering renewals or extras, are listed in the tabulation under the heading "Old pt. No."
